Summary

Computer Engineering student at **VJTI Mumbai** (**CGPA 7.74/10**) specializing in **AI/ML**, with hands-on experience building end-to-end systems in **Python, C++, and JavaScript**. Built a **phishing classifier** with **92% accuracy** on **50k+ URLs** and a **multimodal RAG agent** using **LangGraph**, and led a **4-member team** to ship a live cybersecurity platform. Strong foundation in **DSA, OOP, Operating Systems, and System Design**, with a track record of turning ideas into measurable, working products.

Education

Veermata Jijabai Technological Institute (VJTI), Mumbai - B.Tech Computer Engineering, CGPA: 7.74/10 — 08/2024 - Present
Vidya Niketan College of Science and Commerce, Mumbai - HSC, 84.33% — 01/2022 - 01/2024

Technical Skills

AI/ML: Machine Learning, Deep Learning, NLP, RAG, Agentic AI, Scikit-learn, PyTorch, TensorFlow, LangGraph
Languages: Python, C++, SQL, JavaScript, TypeScript
Core Concepts: DSA, OOP, System Design, DBMS, OS
Frameworks: Flask, FastAPI, React
Databases: PostgreSQL, Neo4j, Redis, ChromaDB
Tools: Git, Docker, Linux

Relevant Experience

Community of Coders (COC), VJTI — Mumbai, India
Team Lead - CodeGuardians (NetShield) — *10/2025 - 02/2026*

- Led a 4-member team to deliver NetShield, an AI-powered cybersecurity platform, across 3 modules in 5 months, achieving a live production launch.
- Coordinated 3 workstreams (backend, ML, frontend) through Git and code reviews, owning architecture decisions and delivery timelines.
- Collaborated across the team to integrate the ML phishing model with the Flask backend and a real-time threat dashboard.
- Delivered AI image detection alongside URL analysis and deployed the platform live on Render.

Projects

MedLearn | *Multimodal RAG Medical Education Agent* | github.com/athrvas017/MedLearn — 07/2026 - Present

- **Tech Stack:** Python, LangGraph, FastAPI, React, BLIP-2, ChromaDB, Gemini, RAGAS, Docker
- Built a 6-node LangGraph agent answering text and image questions on Anatomy & Physiology with citations.
- Implemented BLIP-2 captioning and ChromaDB retrieval to ground every answer in textbook passages.
- Added an evaluator node that scores answer faithfulness (0 to 1) and flags low-confidence responses.
- Generated 3-5 MCQ quizzes on demand and routed text, image, or combined queries through one pipeline.
- Evaluated answer quality using a RAGAS suite of 15+ benchmark cases.

NetShield | *AI-Powered Cybersecurity Platform* | github.com/athrvas017/Code_Guardians — 10/2025 - 02/2026

- **Tech Stack:** Python, Flask, Scikit-learn, PyTorch, NLP, HTML, CSS, JavaScript, Docker
- Developed a TF-IDF phishing classifier reaching 92% accuracy across 50k+ URLs.
- Reduced backend response time by 25% by implementing asynchronous API calls and efficient data modeling.
- Designed a cryptographic toolkit with high-entropy tokenization for secure password generation.

SupplyLens360 | *AI-Powered Supply Chain Intelligence Platform* | github.com/athrvas017/SupplyChain360 — 04/2025 - 04/2025

- **Tech Stack:** Neo4j, NetworkX, FastAPI, Redis, PostgreSQL (Supabase), TypeScript, D3.js, Leaflet.js
- Implemented recursive graph traversal and BOM-aware filtering to map multi-tier supplier risk.
- Created risk intelligence and disruption simulation features for geopolitical and supply chain analysis.

Leadership & Achievements

- Achieved 2nd Runner-Up at SYN3RGY 3.0 Hackathon (DJSCE) with Team Merge Origins, delivering SupplyLens360.
- Earned Hacktoberfest 2025 Super Contributor status across repos with 40+ stars and 140+ contributors.
- Secured 3rd place in Routing Rush at CodeVerse (COC VJTI) and solved 500+ problems on LeetCode, GFG, CodeChef.
- Achieved a 99.90 percentile in MHT-CET and a 98.16 percentile in JEE Main.

Certifications

GFG: Python Programming, Full Stack Development, TensorFlow | drive.google.com/.../1oG57Ho...9u9x — 01/2026 - 01/2026
IBM: Python for Data Science, AI & Development; RAG and Agentic AI | drive.google.com/.../1y__qmRz...JQ6Fe — 01/2026 - 01/2026
